

# He's not just an alley cat. He's a street cat, porch cat, and park cat.

No matter what you call him, no matter where you find him, he's living a valued life. Like squirrels and birds, feral cats are unsocialized and are content living outside.

But where do cats like these come from? Born outside, these unsterilized cats eventually form colonies, making their home wherever they can find food.

Tomcats prowl for mates, females become pregnant, and the cycle of reproduction continues.

To help them, Alley Cat Allies has a cost-effective plan that not only reduces feral cat populations, it also improves and extends the lives of colony members. It's called Trap, Neuter, and Return or TNR. That's right, return. To learn about this smart, compassionate, proven method of population control, or to give a gift of time or money, go to [www.alleycat.org](http://www.alleycat.org). When it comes to caring for feral cats, TNR is the best thing for them.

Because alley cats, barn cats, tomcats, & street cats need a different kind of care.

# Sure, she catches mice. She just doesn't bring them to you.

She's a barn cat, not a pet. But that doesn't mean she's not living a valued life. Just like barn swallows, feral cats are unsocialized and are content living outside. But where do cats like these come from? Born outside, these unsterilized cats eventually form colonies, making their home wherever they can find food.

Tomcats prowl for mates, females become pregnant, and the cycle of reproduction continues.
